

Dear 32 Freeland Residents,

It has been brought to our attention from numerous residents that some residents are disposing of their garbage incorrectly. All garbage bags must be able to go **down the chute freely** and should not be left on the garbage room floor. Large garbage bags should be taken down to the P2 level and dispose of in the appropriate buns provided.

Garbage bags left on the floor inside the garbage room can cause a terrible odor and create an unhealthy environment that could generate unwanted vermin.

We thank you for your cooperation in keeping 32 Freeland clean and safe.

Thank you

32 Freeland MGMT
